ARMINI ENTERPRISES COMPANY LIMITED

NOTES TO THE FINANCIAL STATEMENTS

Period from 26 January 2008 to 31 December 2008

1. Incorporation and principal activities

Country of incorporation

The Company Armini Enterprises Company Limited (the "Company") was incorporated in Cyprus on 26 January 2008 as a private limited liability Company under the Cyprus Companies Law, Cap. 113. Its registered office is at Panteli Katelari, 16, DIAGORAS HOUSE, 7th floor, 1097, Nicosia, Cyprus.

Principal activities

The principal activity of the Company is the holding of investment properties. The Company remained dormant during the period under review.

2. Accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below.

Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union (EU) and the requirements of the Cyprus Companies Law, Cap.113. The financial statements have been prepared under the historical cost convention

The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates and requires Management to exercise its judgement in the process of applying the Company's accounting policies. It also requires the use of assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on Management's best knowledge of current events and actions, actual results may ultimately differ from those estimates.

Adoption of new and revised IFRSs

During the current period the Company adopted all the new and revised International Financial Reporting Standards (IFRS) that are relevant to its operations and are effective for accounting periods beginning on 26 January 2008.

At the date of approval of these financial statements, standards and interpretations were issued by the International Accounting Standards Board which were not yet effective. Some of them were adopted by the European Union and others not yet. The Board of Directors expects that the adoption of these accounting standards in future periods will not have a material effect on the financial statements of the Company except for the application of International Accounting Standard 1 (Revised) "Presentation of Financial Statements" which has a material effect on the presentation of the financial statements and the application of IFRS 7 "(Amendments) - Financial Instruments: Disclosures: Improving disclosures about financial instruments" which will enhance disclosures about fair value measurements and liquidity risk.

Finance costs

Interest expense and other costs on borrowings to finance construction or production of qualifying assets are capitalised, during the period of time that is required to complete and prepare the asset for its intended use. All other borrowing costs are expensed.

Financial instruments

Financial assets and financial liabilities are recognised in the Company's balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Financial instruments (continued)

Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held at call with banks and bank overdrafts. In the balance sheet, bank overdrafts are included in borrowings in current liabilities.

Share capital

Ordinary shares are classified as equity.

3. Financial risk management

Financial risk factors

The Company is exposed to liquidity risk and capital risk management arising from the financial instruments it holds. The risk management policies employed by the Company to manage these risks are discussed below:

3.1 Liquidity risk

Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The Company has procedures with the object of minimising such losses such as maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities.

3.2 Capital risk management

The Company manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance.

Fair value estimation

The fair values of the Company's financial assets and liabilities approximate their carrying amounts at the balance sheet date.

Loss before tax	<u>(12.753)</u>
Tax calculated at the applicable tax rates	(1.275)
Tax effect of expenses not deductible for tax purposes	<u>1.275</u>
Tax charge	<u>-</u>

The corporation tax rate is 10%.

Under certain conditions interest income may be subject to defence contribution at the rate of 10%. In such cases 50% of the same interest will be exempt from corporation tax, thus having an effective tax rate burden of approximately 15%. In certain cases, dividends received from abroad may be subject to defence contribution at the rate of 15%.

Due to tax losses sustained in the period, no tax liability arises on the Company. Under current legislation, tax losses may be carried forward and be set off against taxable income of the following years.
